Maths

- Use the internet to research temperatures in the UK going back over the last few years. Are the average temperatures increasing or decreasing?
- Can you record the hottest and coldest temperatures in the UK for the last 10 /15 years on a line graph?

Out AND About!

- Go on a local walk and see if you can do a litter pick to help the environment.
- As you walk can you spot any signs of the different types of pollution - make a list of the different types and where they were spotted.

LiteRACY

- Write a biography on a significant individual who campaigns for the environment such as Greta Thunberg
- Write a fact file on David Attenborough.

Working with others

- Create a game that teaches children a few facts about Climate Change
- Give it a name, write instructions and create any playing pieces that might be needed (e.g. Climate Change Top Trumps).

Year 6
Tic Tac Toe
Climate Change

Music

- Choose a song and edit the lyrics to create a new piece that encourages people to care for the environment.
- Write your own song about looking after the planet.

ART

- Research climate change artists online - have a look at their work and see which you like the most.
- Challenge yourself to recreate your favourite piece of their work, or even make your own in their style.

PSHE

- Write 5 questions to find out how much someone knows and cares about global warming. Interview them and write down what they say.
- Can you present it as a mini-newspaper report?

GEOGRAPHY

- Create a model to explain the greenhouse effect and its consequences.
- Try using a shoebox with images and labels to demonstrate the greenhouse effect.
